

## AutoLog ControlMan – DEMO KIT Harness GSM- & Internet networks for remote monitoring!

### AutoLog ControlMan DEMO KIT OFFER :

AutoLog ControlMan is complete solution which includes both programmable GSM-RTU units and control room as hosted internet application service. RTU units are installed along the remote targets to perform measurement and control tasks. RTUs are communicating wirelessly via GSM/GPRS network. AutoLog ControlMan web service is used with normal web browser through Internet.

DEMO KIT offer includes all the needed components for system integrators to make application testing, -demonstration and -learning:

- Access to AutoLog ControlMan demo application service pages
- AutoLog GSM-RTU unit with demo application (no SIM card)
- AutoLog HMI for local user interface
- Pt100 sensor, 4...20mA input, digital input simulator
- Programming software, cable and training manuals

After evaluating the DEMO KIT user can perform AutoLog Certified System Integrator (CSI) exam and gain full CSI benefits! Ask more!

**AutoLog ControlMan – DEMO KIT Price: 650 EUR**
