FF-AUTOMATION

www.ff-automation.com

FF-Automation (founded 1976) manufactures AutoLog® RTUs, designs and supplies complete automation SCADA systems for remote monitoring and control applications.

AutoLog® RTUs are used in many industry areas all over the world. Typical customers are – for example – Oil and Gas producers who are using Autolog RTUs for Monitoring and Controlling Oil & Gas wells, pipeline valve stations and pipeline cathodic protection stations, oil & water tank levels etc.

Mr. Jukka Fredriksson in Bahrain year 2008.
- Looking forward to see you again!

FF-Automation can provide complete SCADA solution including Control Room applications, Communication equipments and RTUs. Complete services include also system design, factory and site acceptance tests, training, maintenance, support and spare part guarantee. The goal of our company is to have long term and successful relationships with customers by giving more value to their business with better products and services. For more information about our products, please visit our website www.ff-automation.com.
