"New AutoLog[®] RTU series has designed to be used cost effectively in wide application areas. The modularity and flexibility of this new RTU series let us to choose just the right device for your application and cut off any additional costs " Says Mr Jukka Fredriksson from FF-Automation.

"We have also GSM-RTU's for RTU applications in where Gsm-network offers a good possibility to send & transmit data" Mr Fredriksson continues...

FF-Automation has delivered to Gulf region hundreds of RTU's for CP-applications (Cathodic Protection & Monitoring RTU's) and Oil Wellhead RTU applications.

Autolog® RTU is the right choice for different type of RTU projects:

RTU application

Remote supervision and controlling application

- Cathodic Protection RTU (CP)
- Oil Wellhead Controller
- Substation SCADA RTU
- Transformer station supervision
- Grid controller
- Oil & Gas pipeline RTU
- Water treatment plants , pumping stations
- Machine and device supervision (OEM)
- Burglar alarms , access control
- Building Automation
- Remote meter reading & Control
- Visitor counters etc.
- Transport
- Unmanned stations
- OEM
- Etc.

FF-Automation has different Hardware products from where we then choose right ones depending from customer requirements. FF-Automation can offer as turnkey basis RTU products for your projects.

Please do not hesitate to contact us or our representative.
