

Sistemas & Soluções Industriais

- Who we are:

The AMX Sistemas & Soluções Industriais has 23 years in experience on instrumentation and industrial automation of process plants, pipelines integrity and construction, management of methane fugitives emissions, company advice and much experience in technologies development and innovative solutions.

- Company view:

Develop the company trying to have stable and solid results of profitability, growing associated to credibility for the clients and partners. Be one different company on the market, offering not just products and services, but solutions.

- Company mission:

Quality index, safety, Occupational health, environment's preservation and social responsibility. Be recognized like a solid and reliable service and products company on the

Brazilian and South American oil, gas and energy market.

- Products and services

- Instrumentation:

Specification, installation, calibration and operation tests in instruments of flow, pressure, temperature, level and analyses instruments.

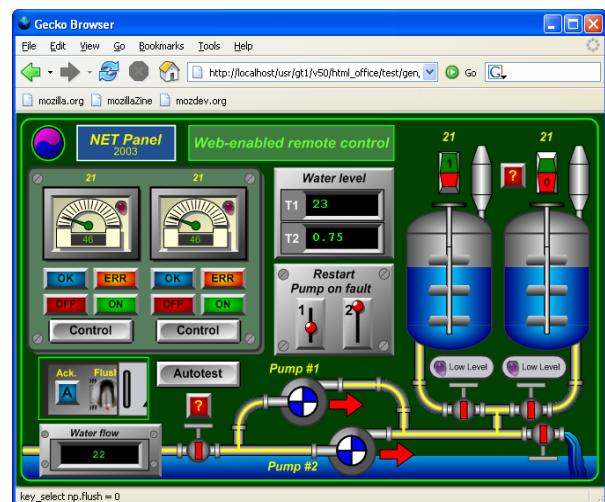

- Industrial automation:

Installation, configuration and PLCs, RTUs and others process control system.

Communication system via radio, satellite and cell phone (GSM).

Supervision and control system.

- Pipeline's integrity and construction:

Pipeline corrosion tracking system and cathodic protection.

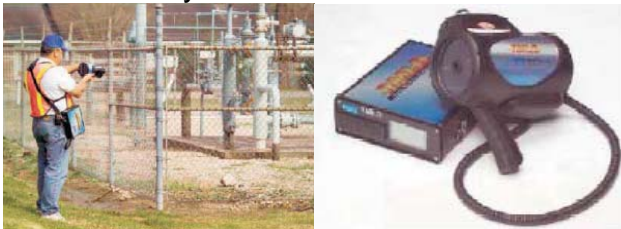

Measuring stations project and construction and custody transfer.

Solutions for pipelines tracking systems (Saddle Bag and Screw Anchor).

- management of methane fugitives emissions:

Detection and measuring methane leak system via infrared on process plants and gas distribution system.

- Company advice

Development of applicable solutions to companies on the industrial, oil, gas and energy sector.

• Industrial Solutions

We develop industrial solutions that meet the operational needs involving the process disciplines of electric, instrumentation and industrial automation.

Example: Regulation, measuring, filtering and qualification of gas, liquid system and alternative generation system (wind, gas and solar), compress air system.

- Previous experiences

Drilling rig manutention

Platforms assembly, project and startup

Pipelines construction

Usefulness system
